

GUYS FARM ACTIVITY CENTRE

RISK ASSESSMENT

Date 30/9/07		Review Date Sept 08		Assessor Paul Hargreaves		Task Orienteering			Assessment No Activity 09	
Hazard No.	Significant Hazards	Persons Affected	Existing Controls	Level of Risk			Further action required			
				High	Med	Low				
01	Stream	Participants	All visitors made aware of stream presence, particularly after rainfall.			X				
02	Weils disease	Participants	Waterproof plasters to be worn over any open wounds or sores Wash hands after activity session.			X				
03	Slips	Participants	Care to be taken during wet weather. Minimize growth of moss etc. which could increase slip factor. Use of rock salt in winter to prevent ice build up on roads/paths.			X X X				
04	Car Park/Roads	Participants	Vehicle movements may be taking place and drivers should be aware of presence of pedestrians Users advised to be aware of HGV's from neighbouring yard moving about or in approaches to centre. Drivers from neighbour are made aware of possibility of young people being around. Course designed so as a requirement to be near this area.			X X X X				
05	Grounds General	Participants	Areas of the centre are naturally uneven, advised in centre brochure & website to make users aware.			X				
06	Wooded areas	Participants	Care to be taken when entering wooded areas, there may be low branches/twigs protruding. Tree/hedge cutting takes place regularly.			X X				

High Risk: Immediate Action Required
Medium Risk: Action within 2 months
Low Risk: Re-assess if changes occur & at next review date
